Catalog Notes for Import Testing

This digital PDF is designed to test Supplier Price List PDF to Shopify CSV extraction. It includes multiple pages, repeated table headers, variants, barcodes, inventory quantities, minimum order quantities, duplicate product titles, missing SKU, and a missing price row. Minimum Quantity is not a product price.

Product Catalog Rows 1-14

Import Guidance and Field Mapping

Supplier PDF Field	Expected Shopify Output Field	Rule
SKU	Variant SKU	Copy only when present. Do not invent missing SKUs.
Product Name	Title and Handle	Use title for product title. Generate handle from title. Handle duplicates must be reviewed.
Variant	Option1 Value	Use when the same product has variants such as color or size.
Description	Body HTML / Description	Use product description text only, not contact info or footer notes.
Unit Price (CAD)	Variant Price	Use explicit price only. Do not use MOQ or inventory quantity as price.
Cost (CAD)	Cost per item	Optional cost field. Do not show if unsupported.
MOQ	Review Notes / optional custom field	Minimum order quantity is not inventory and not price.
Inventory Qty	Variant Inventory Qty	Use only when explicitly labelled inventory quantity or stock available.
Barcode	Variant Barcode	Copy only when numeric barcode is present.
Notes	Review Notes or Body	Use cautiously. Do not import bulk order notes as product title.

Quality-Control Rows Included

The final catalog page includes intentional edge cases: a product with no SKU, a product with no unit price, duplicate product titles, and a row where MOQ is larger than the price. These rows are included to test safe Shopify output behavior.
